Exploring Weather Trends

Data Analysis Nano-Degree - Aviad Giat

Feb 9, 2019

The full analysis of this project can be read on my website. A Github repository with all the files and folders is available [here](#).

In this project I was asked to download data from Udacity's server using SQL queries to my computer and analyze the data with tools I learned. I chose to work with R.>br>

Files in this project: 1. weather\_trends.pdf and .html - that is where the analysis is. 2. weather\_trends.RMD - The file where the code for the analysis is. 3. readme file 4. csv files containing the original data

For this project I used the following technologies: 1. SQL 2. R 3. Rstudio
